

ClariVest Asset Management LLC, a rapidly growing company in San Diego, CA with approximately \$3 billion under management using quantitative tools, is seeking an Analyst to assist with the management of non-US strategies. The successful candidate will have opportunity for exposure to all facets of the investment management process: stock-selection, trading, and portfolio construction.

Strong analytical skills and investment insight required, as well as willingness to work collaboratively in a fast-paced team-oriented environment. Would prefer candidates have one or more of the following: Bachelors/Masters degree or higher in a quantitative discipline; programming experience (especially in SAS, VBA, and Perl); experience with financial databases/tools such as Factset, Bloomberg, IBES, Worldscope, Compustat, Reuters, Datastream, MarketQA, etc; experience building stock-selection models; experience working with non-US equities; experience with using portfolio optimization techniques; experience building transaction cost models.

Please forward resume to jobs@clarivest.com. ClariVest is an equal opportunity employer.
